cost effective solutions

Testadon Certification

Testadon Certified Associate & Architect

Albia® Education Services

Earn recognition. Become certified!

Are you ready to get challenged? Do you want to stand out as a software testing expert? Then becoming Testadon certified Associate or Architect is the next step in the highly competitive technology field.

Albia® provides industrial certification for Testadon that will help you to demonstrate your competency, dedication, and high standard of knowledge within software testing and Testadon. Testadon is pioneering testing platform software developed by Albia® which incorporates User Interface, Functional, Load & Stress, System, and Integration testing and simulation for web enterprise systems.

Albia® Testadon Certification Program forms a standard for knowledge within the software testing industry and Testadon product, and serves as a recognition mechanism for intermediate to advanced knowledge in software testing. Key benefits of becoming Testadon certified are:

- ✓ Recognition of your knowledge and proficiency.
- ✓ Validation of your expertise and skills to your employer.
- ✓ Ability to advance your career.
- ✓ Logo and Certificate to identify you as a Albia® Testadon Certified Professional

Available Certifications:

- Testadon Associate
- Testadon Architect

Supporting course work is provided by Albia® Education Services.

Albia® Testadon

Why Choose Testadon?

Albia® Testadon is the only platform where business analyst and non-programmers can create powerful and complex test cases!

Thanks to Albia® Testadon testers and business analysts can finally focus on testing without having to write a single line of code or script. That means that finally the main objective of testing phase is to detect what is wrong with the system, instead of spending weeks and months on developing test cases. With Albia® Testadon a test case can be written within 5 minutes, then modified within 20 seconds, all because we provide you with GUI where using your mouse you can create any test case you want – either functional or load. Reports get automatically generated, providing full documentation of test case results with figures, statistics, diagrams and charts – so that the tester does not need to do much. Every time you run a test case, a report gets generated in PDF, HTML, or RTF formats.

- ✓ Choose Testadon today!
 - Because testers should be **focused on testing and detecting** software bugs!
- ✓ We provide training based on **YOUR** applications!
